PUBLIC NOTICE **2021 STREET TREE PLANTING PROGRAM**

Program Objectives:

The Village’s Municipal Plan states that “it shall be a policy of Council to encourage the preservation and enhancement of the natural and built environment by protecting and cultivating trees and vegetation in parks and green spaces, and to institute a tree planting program”.

A well-managed street tree population can also bring large dividends for a municipality. These benefits include:

- | | |
|----------------------------|---|
| -Improved air quality | -Reductions in household energy consumption |
| -Traffic calming | -Storm water attenuation |
| -Reduced noise pollution | -Greater wildlife habitat |
| -Increased property values | -Enhanced neighborhood aesthetics |

As a continuation of projects conducted in 2019 and 2020, and with funding support from the Government of New Brunswick Environmental Trust Fund, the Village Public Works Department will be planting trees within the limits of the 20-metre-wide municipal street right-of way at selected locations along your street. Species selection (deciduous trees only) for the respective locations will be determined by the Public Works Department based on site specific criteria and recommended best practices. The proposed tree locations will be staked in advance of the plantings, which are scheduled to be conducted within the next few weeks. A total of 22 trees from a range of species including Bur Oak, Red Maple, Sugar Maple, Ivory Silk Lilac, Ruby Slipper and Red Oak will be planted.

Provided on the following page are details on the species intended for installation as part of the 2021 planting program, and information on their respective sizes at maturity.

If you have any questions or concerns, please contact Rockland Miller, Public Works Supervisor at 451-8508, or by e-mail at rockland.miller@vonm.ca
